

## **Yemeni technical education and training minister visits training centres in Tunisia**

A working session gathered in Tunis, chairmen of the national electricity and mechanics federations and Yemeni technical education and vocational training minister Ibrahim Omar Hajari, on his working visit in Tunisia on December 22-24, 2009.

On this occasion, the Yemeni minister enquired about the activities of these two federations and their role in co-ordinating between UTICA structures and the training centres.

The Yemeni guest visited, on the occasion, several vocational training centres in telecommunication, in the El Khadra district, the sector-based training centre in food industry and the training centre in electronic industry.

At the Rades-based high school, the Yemeni minister was briefed on the activities of this institution which ensures training in several specialties, including woodwork, ironwork and hairdressing.

Mr. Ibrahim Omar Hajari also visited the national trainers' training centre and the sector-based training centre in services, in Gammarth. He also conferred, on the occasion, with Yemeni youths who are making the most of a vocational training in the Tunisian establishments.

The Yemeni minister commended the favourable conditions provided to the trainees and the quality of training ensured by these centres.
