

Tunisian-EU co-operation in technical education looked at

Promotion of technical education was the focal point of the meeting held, on Tuesday in Tunis, between Education Minister Abdellatif Abid and representative of European Training Foundation stemming from the European Union (EU) Marie Dorléans.

On this occasion, the Education Minister underscored keenness of Tunisia, which is ready to start a reform of the school system, to draw on the international experiences to boost technical education and make of it an additional curriculum.

In turn, Mrs. Dorléans stressed the European Training Foundation's will to provide necessary EU support to the radiation of technical education and strengthen position of vocational training in Tunisia. She said that success of technical education requires the establishment of clear gateways between the syllabuses of general and technical trainings to help pupils choose tracks fitting their skills and capacities.
